Drive IT!   Sept. 2019 - Present
Web Application | Kitchener, ON

A web application that looks for the best deals on cars and parts by using Kijiji, eBay, autoTrader, etc.. It has a similar functionality to Honey. When you select a car, it'll provide a coupon to save you the work of searching for parts and provide you the information on where to find them. I am currently working on it and hope to have it published next year.

Key Responsibilities: *(For Drive IT!)*
- Write testable, efficient code by refactoring and debugging
- Integrate data from back-end services and databases
- Gather and refine specifications and requirements based on technical needs
